

## QUALITY POLICY

We have been committed to the highest quality in our work since the introduction of ISO 9001 quality management in 2009. In our more than 50 years of existence, we have successfully implemented numerous projects in Austria and around the world. The successes and challenges of the past have taught us that the importance of high-quality standards and continuous further development are essential in order to meet the requirements of our customers and future markets.

With this in mind, we align our goals with our quality and environmental policy principles.

- **Sustainable use** of available **resources** and a resource-efficient approach in all our projects
- Continuous **further development of our** strategic orientation and **management approaches**
- Ensuring and **improving quality** through regular internal quality circles and opportunities for reflection, e.g. feedback rounds
- Improving and **strengthening our products** through innovative approaches
- **Achieving goals together** through teamwork and collegiality
- **Implementation of** shared **values** in everyday working life
- **Promote** and challenge professionally qualified employees in all business areas through internal and external **training programs**
- **Further development of our network** through intensive cooperation with international experts and partner companies
- Consideration of the needs and **requirements of all**

**If the horizon is clear, you won't be bothered by the little things!**

In order to meet this requirement and incorporate the cornerstones of our understanding of quality, we set new targets at the beginning of each year to fulfill these principles.
